Objective Summery

Self-thought front-end developer driven by a passion for innovation, continuously exploring new technologies to enhance user engagement and elevate web experiences.

Projects

Dotemd • Full-stack application Typescript NextJs Tailwind Appwrite Tiptap

Developed a **full-stack** open-source text editor, empowering users to effortlessly create visually appealing markdown files with versatile features.

- Enabled seamless **text-to-markdown** conversion, **downloads**, and code copying for users.
- Implemented **17 formats**, auto-saving, **template saving**, user **authentication** and documentation.

🐙 /ashrafchowdury/dotemd 🌐 dotemd.vercel.app

Poststrome • Front-End application Typescript NextJs Tailwind GitHub API

Created an open-source image generator app, Poststrome, for creating engaging **repository images** with unique backgrounds, device options, and customizable elements.

- Added template to **create stunning images for social media** with a download and copying feature.
- Customize background colour, device sizes, image size, and shadows for enhanced visual impact.

🐙 /ashrafchowdury/poststrome 🌐 poststrome.vercel.app

Chat App • Full-stack application Javascript ReactJs SCSS Firebase Cypress

Developed a free and user-friendly chat application with **100+ users**, enabling seamless communication with friends, family, and colleagues through **text, images, and file sharing**.

- Developed a feature-rich chat application with **live text, image, and file-sharing capabilities**.
- Implemented **user authentication** and fully responsive features for seamless communication.

Experience

Appwrite • Open-source contribution 🐙 /appwrite/pink

- Implemented a **copy icons feature** which makes **users 50%** more engageable.
- Used **Astro & Svelt** to create the feature, both of these tech I learned to contribute to this project.

Hashnode • Technical writer 🌐 ashrafchowdury09.hashnode.dev

- **6 Techniques** for Exporting Functions in Node.js
- Extract Component props value to another component in Typescript
